

--The FCC SHOULD NOT implement any proposal that would lessen Indiana's Telephone Privacy law protections.

--Indiana's Telephone Privacy law has improved our time at home. We can now eat dinner without being baraged by telephone solicitors who prior to this act would refuse to respect our requests to be removed from their lists.

--We used to receive at least 10 calls per day from everyone from siding salesmen to lawn services. Even after repeatedly telling them we were not interested and not to call again, they refused to comply. We had to start screening our calls through our answering machine or taking the phone off the hook for some peace.

-- Indiana's Telephone Privacy law has been one of the best pieces of legislation in years for the consumer. It has saved us from the spamming & cramming from long distance telephone services that were running rampant prior to this. It took me 6 months of calls to the IRC and letters to the FCC to correct the cramming ATN did to my mother.

PLEASE, DO NOT UNDERMINE INDIANA's Telephone Privacy Law!
